To Whom It May Concern,I live in the mountains of western NC and I can't really pick up any radio stations. I think it is not right for the National Association of Broadcasters to tell me what I can and cannot listen to. I pay for the service and therefore I don't think the NAB should be trying to turn it off! If they are so concerned, they should start listening to the people and do something about it, maybe play better music, or listen to what the people want to hear instead of playing the same stuff 5 times a day because they are getting a kick-back from some band out in Hollywood. I like the Instant Traffic and weather because it helps me when I am traveling and do not know the stations of another city. Do us all a favor and please reject the NAB's petition 04-160!
